

# Aishi Agarwal

Chicago IL 60061 • [agarwal690@gatech.edu](mailto:agarwal690@gatech.edu) • 847-772-9667 • <https://www.linkedin.com/in/aishi-agarwal/>

---

## EDUCATION

**Georgia Institute of Technology**, Atlanta, GA

Expected Graduation: May 2028

*Pursuing a Bachelor of Science in Computer Science (B.S)*

GPA: 4.0/4.0

**Concentrations:** Intelligence (AI/ML), Devices

**Relevant Coursework:** Data Structures and Algorithms, Linear Algebra, Computer Organization & Programming, Discrete Mathematics, Object-Oriented Programming, Multivariable Calculus

## TECHNICAL SKILLS

**Computing Languages and Tools** – Java, C++, C, Python, Linux, GitHub, Visual Studio Code, MS Office

**Web Development** – HTML, CSS, JavaScript

**Data/ML** – pandas, NumPy, matplotlib, statistical techniques, hypothesis testing, regression analysis

## HONORS

Second Place for Actian AI Vector DB – *Hacklytics Hackathon 2026*

First Place ICTM State Contest – *Math Team 2025*

Top 5 in District STEAM Showcase – *Computer Science Club 2025*

National Honorable Mention – *Math Team 2024*

## WORK EXPERIENCE + PROJECTS

### Data Science Hacklytics 2026 Hackathon

- Built RxGuard, an AI-powered drug analyzer using **FastAPI and React**, leveraging **11.5M+ FAERS reports** to identify risky medication combinations.
- Designed a **384-dim vector embedding pipeline** enabling **semantic search**, improving relevance beyond keyword-based methods.  
[Project found here - https://bit.ly/RxGuard](https://bit.ly/RxGuard); [GitHub Repo found here - https://bit.ly/RxGuardRepo](https://bit.ly/RxGuardRepo)

### AI ATL 2025 Hackathon

- Developed BillBuddy, an AI-powered medical bill analyzer using **React.js and JavaScript** with **OCR and NLP** to identify billing errors.  
[Project found here - https://bit.ly/BillBuddy25](https://bit.ly/BillBuddy25); [GitHub Repo found here - https://bit.ly/BillBuddyRepo](https://bit.ly/BillBuddyRepo)

### GT Big Data Big Impact — Club focused on AI for social good

Aug 2025 – ongoing

- Contributed to **LSTM-based time series modeling** to forecast regional economic growth across Georgia (county × sector level).
- Trained models using **sliding-window sequences** (10-year inputs → 3-year forecasts), structuring data for multi-step prediction.
- Developed a **Flask** chatbot backend with **MongoDB integration** to recommend GT clubs based on student majors and interests.
- Integrated **Google Gemini API** for conversational recommendations and intelligent response generation.

### Printpal.io — AI-powered 3D printing startup, Chicago, IL | *Software Developer Intern*

June 2024 – Aug 2024

- Designed and tested back-end Python functions, leveraging **GitHub and VS Code** to improve data accuracy of AI chatbot.
- Built a **web-scraping algorithm to extract key data metrics** from web pages, automating data collection, and improving effectiveness of AI model.

### UIC Prof. DasGupta's Creative Algorithms Lab, Chicago, IL | *Bioinformatics Research Intern*

May 2023 – Aug 2024

- Applied **Python and statistical analysis** to model drug-target success in hypergraphs.
- Conducted bioinformatics research on Ricci curvature methods, **co-authoring a Springer-accepted paper**.  
[Co-authored Research Paper found here - http://bit.ly/HypergraphPaper](http://bit.ly/HypergraphPaper)

### Discovery Partners Institute (Digital Scholars Program), Chicago, IL | *Data Science Intern*

June 2024 – Aug 2024

- Analyzed 30 years of U.S. mental illness; built **Python data pipelines** and **big-data algorithms** to extract insights.
- Leveraged **pandas, NumPy, and matplotlib** to conduct statistical analysis and visualization.
- Presented findings** to faculty and 50 peers; awarded **UIUC Grainger Engineering Data Science DISCOVERY** micro credential.  
[Capstone Project Report + Code found here - http://bit.ly/PyDataAnalysis](http://bit.ly/PyDataAnalysis)

## LEADERSHIP AND COMMUNITY ENGAGEMENT

### Girls Who Code & District STEAM Showcase, Vernon Hills High School, IL – *President*

Aug 2024 – May 2025

- Organized **5 coding camps for 115+ girls and non-binary students** from underserved communities.
- Taught sessions on **cybersecurity, AI software** (with Google's Teachable Machine).
- Directed STEAM showcase of **150+ student projects**; managed logistics and inspired community-wide innovation.

## SOFT SKILLS

**Communication:** Public speaking, team collaboration, analytical writing.
