

Aishi Agarwal

Chicago IL 60061 • aagarwal690@gatech.edu • 847-772-9667 • <https://www.linkedin.com/in/aishi-agarwal/>

EDUCATION

Georgia Institute of Technology, Atlanta, GA

Expected Graduation: May 2028

Pursuing a Bachelor of Science in Computer Science (B.S)

GPA: 4.0/4.0

Concentrations: Intelligence (AI/ML), Devices

Relevant Coursework: Data Structures and Algorithms, Linear Algebra, Computer Organization & Programming, Discrete Mathematics, Object-Oriented Programming, Multivariable Calculus

TECHNICAL SKILLS

Computing Languages and Tools – Java, C++, C, C#, Python, Linux, GitHub, Visual Studio Code, MS Office

Web Development – HTML, CSS, JavaScript, TypeScript, SQL Database

Data/ML – pandas, NumPy, matplotlib, statistical techniques, hypothesis testing, regression analysis

HONORS

Second Place for Actian AI Vector DB – *Hacklytics Hackathon 2026*

First Place ICTM State Contest – *Math Team 2025*

Top 5 in District STEAM Showcase of 300 submissions – *Computer Science Club 2025*

WORK EXPERIENCE + PROJECTS

Aeroseal — Air sealing technology company, Miamisburg, OH | *Artificial Intelligence Intern* June 2026 – July 2026

- Architected **RAG pipeline** and **prompt design** for Aeroseal's production LLM chatbot, improving intent and audience-based routing.
- Debugged **vector database ingestion pipeline**, eliminating stale embeddings from re-indexed content.
- Built a **Sealing Log Analyzer** clustering millions of production logs into a ranked anomaly dashboard to surface software bugs easily.

Data Science Hacklytics 2026 Hackathon

- Built RxGuard, an AI-powered drug analyzer using **FastAPI and React**, leveraging **11.5M+ FAERS reports** to identify risky medication combinations.
- Designed a **384-dim vector embedding pipeline** enabling **semantic search**, improving relevance beyond keyword-based methods.

[Project found here - https://bit.ly/RxGuard](https://bit.ly/RxGuard); [GitHub Repo found here - https://bit.ly/RxGuardRepo](https://bit.ly/RxGuardRepo)

GT Big Data Big Impact — Club focused on AI for social good

Aug 2025 – ongoing

- Contributed to **LSTM-based time series modeling** to forecast regional economic growth across Georgia (county × sector level).
- Trained models using **sliding-window sequences** (10-year inputs → 3-year forecasts), structuring data for multi-step prediction.
- Developed a **Flask** chatbot backend with **MongoDB integration** to recommend GT clubs based on student majors and interests.
- Integrated **Google Gemini API** for conversational recommendations and intelligent response generation.

Printpal.io — AI-powered 3D printing startup, Chicago, IL | *Software Developer Intern*

June 2024 – Aug 2024

- Built a **web-scraping algorithm to extract key data metrics** from web pages, automating data collection, and improving effectiveness of AI model.

UIC Prof. DasGupta's Creative Algorithms Lab, Chicago, IL | *Bioinformatics Research Intern*

May 2023 – Aug 2024

- Applied **Python and statistical analysis** to model drug-target success in hypergraphs.
- Conducted bioinformatics research on Forman & Ricci curvature methods, **co-authored a Springer-published paper**.

[Co-authored Research Paper found here - http://bit.ly/HypergraphPaper](http://bit.ly/HypergraphPaper)

Discovery Partners Institute (Digital Scholars Program), Chicago, IL | *Data Science Intern*

June 2024 – Aug 2024

- Analyzed 30 years of U.S. mental illness; built **Python data pipelines** and **big-data algorithms** to extract insights.
- Leveraged **pandas, NumPy, and matplotlib** to conduct statistical analysis and visualization.

[Capstone Project Report + Code found here - http://bit.ly/PyDataAnalysis](http://bit.ly/PyDataAnalysis)

LEADERSHIP AND COMMUNITY ENGAGEMENT

Data Science @ GT, Georgia Tech – *Director of Outreach*

May 2026 – ongoing

- Leading sponsor outreach and corporate partnerships for Hacklytics 2027.
- Managing external communications and industry relationships for Data Science @ GT.

Girls Who Code & District STEAM Showcase, Vernon Hills High School, IL – *President*

Aug 2024 – May 2025

- Organized **5 coding camps for 115+ girls and non-binary students** from underserved communities.
- Directed STEAM showcase of **150+ student projects**; managed logistics and inspired community-wide innovation.

SOFT SKILLS

Communication: Public speaking, team collaboration, analytical writing.
